-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on \_\_\_\_\_.
- 2a) This action is **FINAL**.                    2b) This action is non-final.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites, “the segments being disposed angularly” in line 10, but it is not clear which segments are referred to (the claim recites segments of first corrugations and segments of second corrugations). Further, it recites that these segments are “disposed angularly or in alignment”, but does not make it clear with what.

The remaining claims are included in this rejection due to their dependence from claim 1.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 5-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Usher.

See the Figs. 5, 6 embodiment of Usher. The alternating sets of zigzag corrugations on the plates read on the claimed “first corrugations . . . comprising successive segments . . . inclined successively in a first sense and a second sense”, and the illustrated inlet and outlet corrugation regions above and below these zigzag corrugations read on the “second corrugations”. Note

that these inlet and outlet region corrugations are aligned with an axis that transverses the longitudinal plate axis along which the corrugations shown at "B" are directed at an angle of approximately 60 degrees, which clearly falls within the claimed range of 45 to 90 degrees.

Regarding claim 8, the term "plurality" includes the possibility of as few as two deformation zones, which Usher shows. Thus, the variable spacing language of claim 8 fails to distinguish because the claim is not considered to explicitly or implicitly recite at least 3 successive deformation zones.

Claims 2-4 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The remaining references of record show various corrugated plate patterns for plate heat exchangers.
